Education

Olin College of Engineering, Needham MA - *Computer Science* May 2028
Recipient of 4-year merit-based 50% Olin Tuition Scholarship *GPA: 3.92/4.0*
Coursework: Data Structure & Algorithm, Software Systems, Computer Architecture, Machine Learning

Honors

International Collegiate Programming Contest – Top 5 in District 2025
USA Computing Olympiad Gold Division – Top 500 Pre-College Students Nationally 2023
American Computer Science League – Two-time National Finalist 2023
Google Kickstart 2022 Round C – Ranked Top 2% Globally 2022

Experience

Software Engineer Intern | Bloomberg June 2026 - July 2026

- Reduced the internal team's time spent on Quality Control processes by **7** by building a workflow orchestrator using **JavaScript** & **React** frontend, **Java** & **Spring Boot** backend, deployed via **Maven**, monitored via **Grafana**
- Spearheaded the research & presented solutions for secure integration using SSL certificates and authentication with **Airflow** on the existing team infrastructure platform

Software Engineer Research Intern | Raytheon BBN Technologies May 2025 - Aug 2025

- Refined **Python** data handler by integrating real-time processing of track quality, position error covariance, and confidence level via a customized message protocol
- Implemented system calibration using **MATLAB** to compute offsets on signal frequency, amplitude, & TDOA
- Presented software to ***50+*** stakeholders for a ***$1.5M*** project funding opportunity

Mobile App Developer & Researcher | Olin PLai (AI) Lab Jan 2025 - Present

- Designed & developed an iOS App in **Swift** that gamifies rehabilitation exercises for chair-bound or bed-bound elderly to exercise remotely using Computer Vision and AR glasses
- Achieved ***95%*** positive feedback rates at local Senior Center by integrating Multimodal AI Voice Agent using **LiveKit** to provide guidance on navigation of the interface and instructions on movements of the body
- Showcased product to ***3,000+*** attendees at Stanford Engineering Centennial

Software Development Research Intern | Raytheon BBN Technologies Jun 2024 - Aug 2024

- Independently developed a large, distributed network management UI scalable for millions of government users using **Kotlin** and **Jetpack Compose**, and created a backend server using **Python Flask**
- Reduced ***56%*** of memory usage and ***84%*** of lookup time for network pairs by optimizing data architecture and streamlining backend processing of **OpenAPI**-defined API endpoints
- Spearheaded ***5+*** UI/UX design proposals & organized *3* team review meetings

Projects

Truly | *https://trulyta.com* Jun 2026 - Present

- Independently built and launched an AI-native, behavioral-focused talent assessment platform within **4 weeks**, won **Top 3** in the **Ship Season 2026 Demo Day** with partnerships from **3+ startups**
- Conducted **80+ market research, discovery, and sales calls**, assessed **100+ candidates**, and built a **10+ company waitlist** through direct customer outreach and validation
- Architected **multimodal** evaluation pipelines using **Nextjs, Supabase, GPT-4o, LangChain, & RAG**, with AI agents analyzing **codebases, text, images, and screen recordings** to generate performance insights

Factuality | https://we1chj.github.io/FactualityPage Dec 2024 - Jan 2025

- Won ***1st*** place in the Generator Entrepreneurship & AI Buildathon with ***$2,500+*** project funding
- Developed & published a Chrome extension in **React** & **Tailwind CSS**, featuring easy fact-checking by integrating AI web-scraping for citations and sources by prompt-engineering via **ChatGPT** & **Perplexity** API

Skills

Frontend: JavaScript, TypeScript, React, Nextjs, Jotai, Kotlin Multiplatform, Jetpack Compose, ThreeJS
Backend: C/C++, Python, Java, Kotlin, Flask, Firebase, Supabase, Spring Boot, PostgreSQL, MongoDB
Deployment: Git, GitHub CI/CD, Vercel, Cloudflare, Trigger, Apache Maven, Gradle, Jenkins
ML/AI: Multimodal AI, RAG, LangChain, CV, OCR, RL, Livekit, Vapi, Cursor, Claude Code, Codex
Misc: AWS, Docker, Kubernetes, Airflow, MATLAB, Swift, Grafana, Bash, OpenAPI, Linux, Unity, ROS2
